

What guarantees do you supply?

We offer a six year manufacturer's guarantee on the solar panels and two years on the pump and controls. The guarantee on the cylinder depends on the manufacturer, which varies depending on which system is chosen. This relates to defects in the manufacture of the components and not any subsequent damage. If we install the system ourselves, we offer a one year guarantee on our workmanship. In the event of any dispute over whether the guarantee applies, we would use the arbitration service of the Solar Trade Association to resolve any disputes.
